13 LESSONS IN THINKING FASTER, SMARTER & BIGGER

BEAT

#### IN THE MIX

#### SLATE PRO AUDIO RAVEN MTX MIXING DESK

This audio production system comprises a state-of-the-art touchscreen display and a multitouch mixer that can control most digital audio workstations. The Raven MTX has a huge 46" commercial-grade backlit LED screen of 2mm glass, which can be viewed at a wide angle and is coated with the

company's NANO GLIDE surface for ultra-smooth mixing. Digitally controlled analogue circuits also eliminate concerns about scratchy pots or noisy switches. "Will is having one installed," says will.i.am adviser DJ Keebz. "Serial number 0001, to be exact." From £13,350 [slateproaudio.com](http://slateproaudio.com)

On the 46" screen, plugins become the size of 19" outboard gear, so you can tweak them easily

There are four speaker and eight channel-cue outputs, plus a 7.1 module, USB ports and an iPhone dock
